

This is my *first* document prepared in L^AT_EX. I type it on June 13, 2017.

We have seen that to typeset something in L^AT_EX, we type in the text to be together with some L^AT_EX commands. Words must be separated by spaces (does not matter how many) and lines maybe broken arbitrarily.

The end of paragraph is specified by a *blank line* in the input. In other words, whenever you want to start a new paragraph, just leave a blank line and proceed.

Carrots are good for your eyes, since they contain Vitamin A. Have you ever seen a rabbit wearing glasses?

The numbers 1, 2, 3, etc. are called natural numbers. According to Kronecker, they were made by God; all else being the works of Man.

I think L^AT_EX is fun.

Note the difference in right and left quotes in ‘single quotes’ and “double quotes”

X-rays are discussed in pages 221–225 of Volumn 3—the volume on electromagnetic waves.

Maybe I have now learnt about 1% of L^AT_EX.

This is the first line.

This is the second line.

The T_EXnical Institute

CERTIFICATE

This is to certify that Mr. N. O. Vice has undergone a course at this institute and is qualified to be a T_EXnician.

sans serif family, boldface series, uoright shape

roman family, medium series, slanted shape

A polygon of three sides is called a triangle and a polygan of fo ur sides is called a quadrilateral

A polygon of three sides is called a *triangle* and a polygan of fo ur sides is called a *quadrilateral*

By a **triangle**, we mean a polygon of three sides.
